## Product Specification Sheet

With IC Markets Global Stocks CFDs Traders can access over 100 stocks across three exchanges; NASDAQ, NYSE and the ASX across Australia and the United States. Stock CFDs are available exclusively on MetaTrader 5, providing traders with more flexibility.

When trading any US listed equities with IC Markets Global, the Dividend adjustments on your long positions are credited to your account, and the applicable withholding taxes are automatically deducted. The deduction rate varies depending on the underlying market, but where a treaty between Australia and the relevant market exists, the rate may be reduced to 15%. Please note that the withholding tax deduction doesn't apply to short positions.
